

OTHELLO – provisional Technical Rider

Arrival : 2/3h before the show (according to what has been decided with our tour manager)

Duration of play : 90min

We perform without a break unless the venue would like to have one

CAST: 6 actors - 2 dressing rooms for 6 actors 2 females 4 males.

Even if the performance happens outside we prefer to have dressing rooms indoors.

Dressing rooms can be rooms / additional toilets or any kind of private space the venue can provide.

Special needs: In case there are no dressing rooms space available please inform us. We bring our own lights so we need power / several sockets. Please send us detailed information about where power is located. If the venue is hard to find please send us a map for the audience.

The area where we will perform needs to be privatized so that no people will have access to it, unless they have tickets, during the performance.

STAGE / DIMENSIONS and SOUND

We bring our own stage and sound. We bring our own chairs.

We need a space of 8m width and 6.5m depth including the stage (6m wide/4,5m depth)
2m of back stage depth required

Additional information: It would be great if the venue could get water/ coffee / tea for the team. We arrive with 1 van and 1 trucks. Drivers can get in contact with you to find the easiest way to park to unload.

We do not travel with toilets. We would appreciate if the venue would be able to provide them for the actors and for the audience.

NO SMOKE – NO FIRE in the show
